3M™ Scotchlite™ High Gain Reflective Sheeting 7610

Technical Data

Product Description

3M™ Scotchlite™ Sheeting 7610 is a high gain reflective industrial grade sheeting, exposed-lens, retroreflective, plastic-based material, pre-coated with a pressure-sensitive adhesive that is covered with a removable protective liner that offers very high retroreflective efficiency and small optical elements.

Features

- Sealed-lens surface.
- Thin construction.
- Exceptional reflective gain.
- Ease of angularity.
- Ease of conformability.
- For various shaped items, including cylinders.
- Angularity allows pickup from moving objects.

Available Sizes

Widths: 1/2 in. (1.27 cm), 3/4 in. (1.90 cm), 1 in. (2.54 cm), 2 in. (5.08 cm).

Lengths: 50 yds. (45.7 m)

Application Ideas

- This industrial grade reflective sheeting is recommended for applications demanding very high retroreflective efficiency; however, its use is limited to manual application, since the material is too thin to perform in automatic application equipment.
Application Techniques

Hand application is recommended, as the material is too thin to perform in application equipment.

Application may be made at temperatures as low as 10°F (-12°C) to a clean and dry surface; however, it is recommended that application be made at 60°F (16°C) to 80°F (27°C).

Avoid touching the reflective surface, since skin oils will reduce the retroreflective brightness. Brightness can be restored by cleaning with a soft cloth and a dilute solution of mild detergent in water.

The sheeting will remain serviceable for many years when properly applied to a suitable substrate and used in typical indoor or outdoor environments.

Use in a high temperature environment (above 350°F [177°C]) for an extended period of time could permanently reduce retroreflective efficiency.

Storage Conditions

3M™ Scotchlite™ High Gain Reflective Sheeting 7610 should be stored in a cool, dry area, preferably at 70-75°F (20-24°C) and 30-50% relative humidity, and horizontally in the shipping carton. Avoid pressure from stacking.

Shelf Life

Product should be applied within one year after purchase.

For Additional Information

Important Notice

3M MAKES NO WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. User is responsible for determining whether the 3M product is fit for a particular purpose and suitable for user's application. Please remember that many factors can affect the use and performance of a 3M product in a particular application. The materials to be bonded with the product, the surface preparation of those materials, the product selected for use, the conditions in which the product is used, and the time and environmental conditions in which the product is expected to perform are among the many factors that can affect the use and performance of a 3M product. Given the variety of factors that can affect the use and performance of a 3M product, some of which are uniquely within the user's knowledge and control, it is essential that the user evaluate the 3M product to determine whether it is fit for a particular purpose and suitable for the user's application.

Limitation of Remedies and Liability

If the 3M product is proved to be defective, THE EXCLUSIVE REMEDY, AT 3M’S OPTION, SHALL BE TO REFUND THE PURCHASE PRICE OF OR TO REPAIR OR REPLACE THE DEFECTIVE 3M PRODUCT. 3M shall not otherwise be liable for loss or damages, whether direct, indirect, special, incidental, or consequential, regardless of the legal theory asserted, including, but not limited to, contract, negligence, warranty, or strict liability.

This Industrial Adhesives and Tapes Division product was manufactured under a 3M quality system registered to ISO 9002 standards.
